REFERENCE

PROFILE

A versatile and results-driven IT professional with expertise in web development, database administration, and technical support. Adept at leading projects such as SFAST (School Fees App. System Technology) and PrimeDOTS (Document Online Tracking System), delivering innovative and user-centric solutions, and addressing complex technical challenges. Recognized for a dynamic approach to problem-solving, effective collaboration with stakeholders, and a commitment to continuous learning and professional growth. Eager to take on new challenges, contribute to impactful outcomes in fast-paced, and technology-driven environments.

WORK EXPERIENCE

[Redacted] 2021 - 2025

| Web Application Developer

- SFAST (School Fees Application System Technology) Project: Successfully led the end-to-end development of an innovative system designed to streamline fee payments, improve financial tracking, and enhance operational efficiency for schools.
- PDOTS (Prime Document Online Tracking System) Project: Led the development of a system to enhance document accessibility and streamline workflows, enabling efficient tracking, retrieval, and management, which improved processing speed and team collaboration.
- Developed, designed, and maintained web application using HTML, CSS, Javascript, and backend technologies.
- Managed database systems, ensuring data integrity and optimizing query performance.
- Collaborated with cross-functional teams to gather requirements and implement effective solutions.
- Conducted code reviews and contributed to best practices to ensure high-quality code and maintainable applications.

[Redacted] 2020 - 2021

| IT Services Support Specialist

- Resolved a wide range of technical issues by efficiently coordinating with various teams to implement timely solutions for customers and end-users.
- Provided Tier 1 & 2 support to internal users, both technical and non-technical, delivering expert troubleshooting and resolving complex issues through efficient assistance, ensuring minimal disruption to operations.
- Guided users in identifying issues, providing clear explanations of solutions to restore services and functionality.
